Subject: RE: final comments on the NBH CAD cell model report

Paul and all - I'm available this Friday 5/21 before noon, Monday 5/24 10:30 - 2:30, Tue 5/25 9-11, 1-2 and 3-5, and anytime Wed 5/26. Let me know your availabilities and I'll set up a conf. call. Overall, I do not see any real schedule urgency with the UHCC modeling, if that helps your planning.

Dave

▼ "Schroeder, Paul R ERDC-EL-MS" ---05/19/2010 02:59:09 PM---Dave, I will package the final product as a pdf ASAP, hopefully tonight.

Subject: RE: final comments on the NBH CAD cell model report

Dave,

I will package the final product as a pdf ASAP, hopefully tonight.

When would you like to talk about modeling the upper harbor CAD cell? Having the call ASAP would be best for us so that we can plan for it since there are a lot of activities going on.

Paul

thanks Paul - looks like that just about does it. I've attached the Word file with all the most recent changes accepted and comments deleted. I assume the last step is for the final product to be "packaged" - i.e., figures and tables attached, Could you send us a pdf of the final product once this is done? Actually, our monthly public meeting is next Thursday 5/27, it'd be great if we could have it up and posted on our website by then if at all possible.

Also, on the larger question of whether to start modeling the upper harbor CAD cell, maybe we should have a quick conference call to see about availability, timeframes, etc.

Thanks again - Dave

Dave,

I addressed your comments incorporating your changes except where noted
in
the comments which contain some clarifications.

Paul

Dave,

I addressed all of your comments, except the mentioning of activated carbon which I understand that you did not want a control section added. Do you want a statement added to the conclusion #9 that the losses between dredging seasons could be reduced by broadcasting activated carbon? I also added a conclusion regarding acceleration of the placement schedule.

Please check out the changes and then I will finalize the document.

Paul

Subject: final comments on the NBH CAD cell model report

Hello - thanks to all involved with this effort. Looks to me like we have a very good product. My relatively few and minor comments are attached in blue text.

My one over-arching comment (repeated in the attachment) is this: the modeling assumes placement over three years, yet our cost estimates are now assuming only one or two years (depending on funding) to fill the cell. Can the report add a short discussion about but what the likely impact would be (i.e., higher or lower losses) if the cell is filled over a shorter time frame - i.e., one or two years?

Thanks again - Dave

p.s. - I'll look over the tables and figures early next week and get any comments on those to you as well)
